Guidelines

2 The Automobile Insurance Rate Board (AIRB) may issue guidelines respecting location and movements on the Grid.

Base Premium and Differential Adjustments

3(1) The base premium for a relevant driver and occasional driver is an amount to be published by the AIRB no later than October 31 each year for the following calendar year.

(2) On or before October 1 in each year, the AIRB may adjust the base premium or any differentials based on the annual review conducted under section 8 of the Automobile Insurance Premiums Regulation.

(3) In making adjustments to differentials, the AIRB must ensure the differential for the Northern and Rest of Alberta territories is at least 20% less than for the Edmonton or Calgary territory.

- (4) An adjustment made under section 3 is effective the following January 1.
- (5) Information about the adjustments made under section 3 must be made publicly available.

Relevant and Occasional Drivers

4(1) The relevant driver and any occasional driver of a private passenger vehicle must be determined in accordance with this section.

(2) If the policyholder has the same number of private passenger vehicles as there are drivers of those vehicles, each driver must be matched to a vehicle, and the drivers are the relevant drivers in respect of the vehicles to which they are matched.

(3) If the policyholder has more private passenger vehicles than there are drivers of those vehicles,

- (a) each driver must be matched to a vehicle, and
- (b) for those vehicles not matched with a driver, the drivers already matched must be matched with the one or more unmatched vehicles, starting with the driver who has the lowest differential determined under section 7(1)(b),

and the drivers are the relevant drivers in respect of the vehicles to which they are matched.

(4) If the policyholder has fewer private passenger vehicles than there are drivers of those vehicles,

- (a) the highest rated drivers must be matched with the vehicles first, but an inexperienced driver may not be matched unless the inexperienced driver is the principal driver of one of the vehicles, and the drivers are the relevant drivers in respect of the vehicles to which they are matched, and
- (b) the remaining drivers must not be matched with respect to any of the vehicles unless the drivers are inexperienced drivers, in which case those inexperienced drivers are considered to be occasional drivers.

(5) If the number of occasional drivers is equal to or less than the number of passenger vehicles, each occasional driver must be matched to a vehicle.

(6) If there are more occasional drivers than there are vehicles, each occasional driver must be matched to a vehicle starting with the occasional driver who is the highest rated driver, but in no case may more than one occasional driver be matched in respect of the same vehicle.

Locating the Correct Grid Step

5(1) A Grid step must be established for each driver of a private passenger vehicle.

(2) A Grid step is first established for a driver

- (a) with respect to a driver under basic coverage for a private passenger vehicle in effect on September 30, 2004, as of the relevant date of that coverage, and
- (b) if clause (a) does not apply in respect of a driver, the first time a policy for basic coverage for a private passenger vehicle comes into effect on or after October 1, 2004 under which the driver is included.

(3) The Grid step is first established for a driver by moving down one Grid step from Grid step zero for each year of driving experience then, if applicable, moving up 5 Grid steps for each at fault claim during the 6 years preceding the relevant date.

(4) An insurer must, with respect to each subsequent application for basic coverage, make any necessary adjustments to the driver's location on the Grid under subsections (5) and (6), starting from the previous Grid location for that person, whether or not location on the Grid was previously established by the same insurer.

- (5) If, during the term of the policy being renewed or replaced,
- (a) the driver had an at fault claim, the driver must be moved up 5 Grid steps for each at fault claim during the term of the policy, or
 - (b) the driver did not have an at fault claim and is not already located at Grid step -15, the driver must be moved down one Grid step for each full year of driving experience with no at fault claim since the driver's location on the Grid was last changed or, if it has never changed, since the driver's location on the Grid was first established.
- (6) Despite subsection (5), if no at fault claim have been made for the 6 consecutive years of driving experience immediately preceding the coming into effect or renewal of a policy for basic coverage, and the driver is located higher than Grid step zero, the driver must be located on Grid step zero.
- (7) Every insurer must on the request of another insurer provide to that insurer any information necessary to determine a driver's location on the Grid, including information about his or her current location on the Grid.

Surcharges for Driving Convictions and At-Fault Claims

6(1) The differentials are to be determined for a driver in accordance with "Base Premium and Differentials for the Calculation of Grid Premium" for each of the following:

- (a) for major convictions on a driver's abstract within the 3 years before the effective date of basic coverage or renewal of basic coverage;
- (b) for minor convictions on a driver's abstract within the 3 years before the effective date of basic coverage or renewal of basic coverage;
- (c) for criminal code convictions on a driver's abstract within the 4 years before the effective date of basic coverage or renewal of basic coverage.

(2) A differential is to be determined for a driver in accordance with Base Premium and Differentials for the Calculation of Grid Premium" for a driver who in the 3 years before the application for basic coverage has had 2 or more at fault claims.

Calculation of Grid Premium

7(1) After each driver is located on a Grid step in accordance with section 5, a premium must be determined for each driver as follows:

- (a) Determine the differential by which to multiply the base premium in accordance with the Differentials in section 8 for Grid step, territory, third party liability limit, at-fault claims, minor, major, and criminal code convictions.
- (b) Multiply the following from clause (a).

$$A = \text{Grid Step} \times [1 + (\text{At-fault Claims} - 1) + (\text{Minor Convictions} - 1) + (\text{Major Convictions} - 1) + (\text{Criminal Code Convictions} - 1)]$$

- (c) Multiple the base premium by the remaining differentials from clause (a):

$$\text{Grid Premium} = \text{Base Premium} \times \text{Territory} \times \text{Third Party Liability Limit} \times A$$

(2) The Grid premium for bodily injury, property damage tort and accident benefits for a private passenger vehicle is the premium for the relevant driver determined in subsection (1) plus 25% of the premium determined in subsection (1) for the occasional driver, if any, of that vehicle.
